

Comos iAge – Professional Systematic Maintenance

Comos iAge is a comprehensive, self-contained, fully-integrated system featuring a complete range of functions for the planning and organisation of maintenance, repair and inspection tasks. The many different preventive and condition-based maintenance measures mapped within the system are structured in a clear, systematic manner.

Today, maintenance is no longer seen as simply a cost issue but as a key factor in the economic success of an enterprise. **Comos iAge** was developed as a user-friendly, flexible maintenance system, able to handle highly complex tasks and play a significant role in plant optimisation whilst minimising the risk of production downtimes. Even from the planning phase, methodic approaches such as risk classification help to ensure reliable decision-making and marked improvements in the handling and analysis of all tasks, including resource planning and management. **Comos iAge** supports the entire life cycle of an industrial plant. The platform-

Key advantages at your fingertips:

- “ Seamless bidirectional transition between planning and maintenance ”
- “ Storage of the entire plant documentation on a central database ”
- “ High level of standardisation yielding optimum evaluation capabilities ”
- “ Integration of risk-based planning methods ”
- “ Add-on modules for optimised in-house or mobile deployment ”
- “ ERP system compatibility ”

Comos iAge

independent, open system architecture permits seamless integration into existing IT system landscapes, meaning that **Comos iAge** helps you to minimise risks and costs whilst substantially enhancing the quality, reliability and overall performance of the plant.

Feature overview:

“Planning and execution of preventive, corrective and condition-based maintenance”

“Planning and execution of lubrication activities and inspections”

“Manual and automatic maintenance previews”

“Configurable work packages with user-defined information content”

“Complete traceability through workflows and histories”

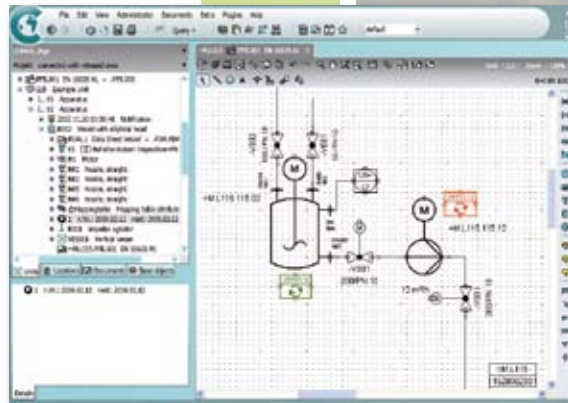

“Capture and evaluation of standard and customer-specific performance indicators”

“Administration of personnel, qualifications and roles”

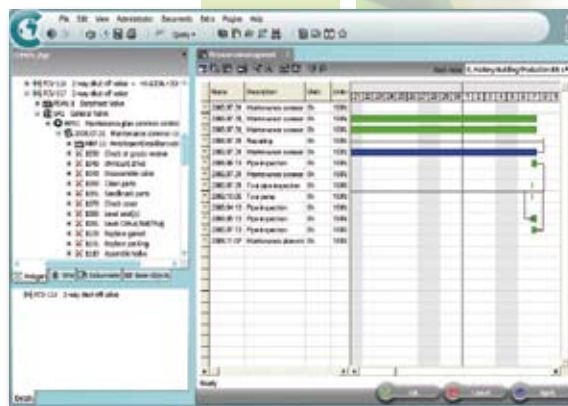

“Graphic scheduling and resource management”

“Warehouse and spare parts management”

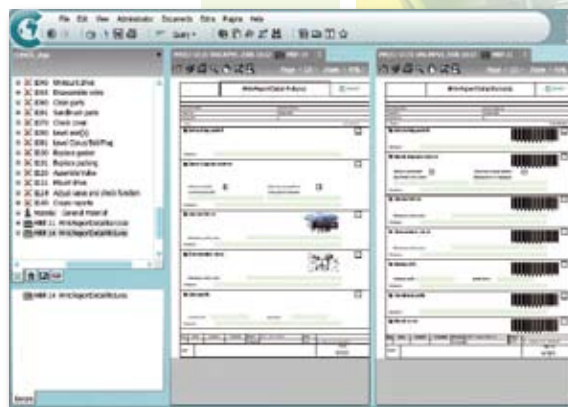

“Job management in combination with ERP”

Maintenance information can be dynamically displayed in any desired document (e.g. P&ID)

Graphic resource planning with interface to scheduling tools

Generation of work instructions with definable information content

A Siemens Business

As a world-leading provider of comprehensive Life Cycle Management systems, **Comos Industry Solutions** offers professional software solutions and services. The integrated **Comos** concept is designed to cater for both customer-specific requirements and established industrial processes. The individual modules can be used as either stand-alone software or as a complete software suite. **Comos** is the complete solution for end-to-end basic and detail engineering processes, catering for all industrial plant life-cycle phases. The **Comos** philosophy, products and services have long been trusted by plant designers, operators and contractors.
